CONTENTS

VOLUME 123 • NUMBER 1 • JANUARY 2004

1 Richard Horn. *Commentary:* How S4 segments move charge. Let me count the ways

5 Damian C. Bell, Huan Yao, Renee C. Saenger, John H. Riley, and Steven A. Siegelbaum. Changes in local S4 environment provide a voltage-sensing mechanism for mammalian hyperpolarization–activated HCN channels

21 Sriharsha Vemana, Shilpi Pandey, and H. Peter Larsson. S4 movement in a mammalian HCN channel

33 R.P. Schuhmeier and W. Melzer. Voltage-dependent Ca^{2+} fluxes in skeletal myotubes determined using a removal model analysis

53 Tamara Rosenbaum, Ariela Gordon-Shaag, Mika Munari, and Sharona E. Gordon. Ca^{2+}/calmodulin modulates TRPV1 activation by capsaicin

63 Tatiana I. Rebrik and Juan I. Korenbrot. In intact mammalian photoreceptors, Ca^{2+}-dependent modulation of cGMP-gated ion channels is detectable in cones but not in rods

77 Victor G. Romanenko, George H. Rothblat, and Irena Levitan. Sensitivity of volume-regulated anion current to cholesterol structural analogues

VOLUME 123 • NUMBER 2 • FEBRUARY 2004

89 Olaf S. Andersen. The 57th Annual Meeting and Symposium of the Society of General Physiologists: The Biology of Chloride. (Organized by H. Criss Hartzell and Michael Pusch)

95 Paul F. Cranefield Award to Daniel H. Cox

97 Diego Restrepo. *Commentary:* What the frog's nose tells the frog's brain

99 Ivan Manzini and Detlev Schild. Classes and narrowing selectivity of olfactory receptor neurons of *Xenopus laevis* tadpoles

109 Alessio Accardi, Ludmila Kolmakova-Partensky, Carole Williams, and Christopher Miller. Ionic currents mediated by a prokaryotic homologue of CLC Cl^- channels

121 Vladimir V. Matchkov, Christian Aalkjaer, and Holger Nilsson. A cyclic GMP–dependent calcium-activated chloride current in smooth-muscle cells from rat mesenteric resistance arteries

135 Ulrike Laitko and Catherine E. Morris. Membrane tension accelerates rate-limiting voltage-dependent activation and slow inactivation steps in a Shaker channel

155 Howard K. Motoike, Huajun Liu, Ian W. Glaaser, An-Sufi Yang, Michihiro Tateyama, and Robert S. Kass. The Na^+ channel inactivation gate is a molecular complex: a novel role of the COOH-terminal domain

167 Andriy V. Yeromin, Jack Roos, Kenneth A. Stauderman, and Michael D. Cahalan. A store-operated calcium channel in *Drosophila* S2 cells

183 Acknowledgment

VOLUME 123 • NUMBER 3 • MARCH 2004

185 Isobel K. Franklin and Claes B. Wollheim. *Commentary:* GABA in the endocrine pancreas: its putative role as an islet cell paracrine-signalling molecule

191 Matthias Braun, Anna Wendt, Bryndis Birnir, Jonas Broman, Lena Eliasson, Juris Galvanovskis, Jesper Gromada, Hindrik Mulder, and Patrik Rorsman. Regulated exocytosis of GABA-containing synaptic-like microvesicles in pancreatic β-cells

205 Christopher A. Ahern and Richard Horn. Specificity of charge-carrying residues in the voltage sensor of potassium channels

217 Baron Chanda, Osei Kwame Asamoah, and Francisco Bezanilla. Coupling interactions between voltage sensors of the sodium channel as revealed by site-specific measurements

231 Bradley S. Launikonis and D. George Stephenson. Osmotic properties of the sealed tubular system of toad and rat skeletal muscle

249 R. Daniel Peluffo, Yukio Hara, and Joshua R. Berlin. Quaternary organic amines inhibit Na,K pump current in a voltage-dependent manner: direct evidence of an extracellular access channel in the Na,K-ATPase

265 Froylan Gómez-Lagunas, Cesar V.F. Batista, Timoteo Olamendi-Portugal, Martha E. Ramírez-Domínguez, and Lourival D. Possani. Inhibition of the collapse of the *Shaker* K^+ conductance by specific scorpion toxins

281 Avi Priel and Shai D. Silberberg. Mechanism of ivermectin facilitation of human $P2X_4$ receptor channels

295 Tamara Rosenbaum, Ariela Gordon-Shaag, León D. Islas, Jeremy Cooper, Mika Munari, and Sharona E. Gordon. State-dependent block of CNG channels by dequalinium

305 Tinatin I. Brelidze and Karl L. Magleby. Protons block BK channels by competitive inhibition with K^+ and contribute to the limits of unitary currents at high voltages

321 Correction

VOLUME 123 • NUMBER 4 • APRIL 2004

323 Michael Pusch. *Commentary:* Ca^{2+}-activated chloride channels go molecular

327 Zhiqiang Qu, Rodolphe Fischmeister, and Criss Hartzell. Mouse bestrophin-2 is a bona fide Cl^- channel: identification of a residue important in an ion binding and conduction

341 Sudha Chakrapani, Timothy D. Bailey, and Anthony Auerbach. Gating dynamics of the acetylcholine receptor extracellular domain

357 Pablo Artigas and David C. Gadsby. Large diameter of palytoxin-induced Na/K pump channels and modulation of palytoxin interaction by Na/K pump ligands

377 Guangju Ji, Morris E. Feldman, Kai Su Greene, Vincenzo Sorrentino, Hong-Bo Xin, and Michael I. Kotlikoff. RYR2 proteins contribute to the formation of Ca^{2+} sparks in smooth muscle

387 Joseph F. Consiglio and Stephen J. Korn. Influence of permeant ions on voltage sensor function in the Kv2.1 potassium channel

401 Takahiro Yasuda, Richard J. Lewis, and David J. Adams. Overexpressed $Ca_v\beta3$ inhibits N-type ($Ca_v2.2$) calcium channel currents through a hyperpolarizing shift of "ultra-slow" and "closed-state" inactivation

417 Christophe Duranton, Stephan M. Huber, Valerie Tanneur, Verena B. Brand, Canan Akkaya, Ekaterina V. Shumilina, Ciprian D. Sandu, and Florian Lang. Organic osmolyte permeabilities of the malaria-induced anion conductances in human erythrocytes

427 Xin-Ling Du, Zhan Gao, Chu-Pak Lau, Shui-Wah Chiu, Hung-Fat Tse, Clive M. Baumgarten, and Gui-Rong Li. Differential effects of tyrosine kinase inhibitors on volume-sensitive chloride current in human atrial myocytes: evidence for dual regulation by Src and EGFR kinases

441 Anke Dahlmann, Min Li, ZhongHua Gao, Deirdre McGarrigle, Henry Sackin, and Lawrence G. Palmer. Regulation of K_{ir} channels by intracellular pH and extracellular K^+: mechanisms of coupling

455 Julia M. Wang, Soung Hun Roh, Sunghwan Kim, Chul Won Lee, Jae Il Kim, and Kenton J. Swartz. Molecular surface of tarantula toxins interacting with voltage sensors in K_v channels

469 Correction

VOLUME 123 • NUMBER 5 • MAY 2004

471 Edward G. Moczydlowski. *Commentary:* BK channel news: full coverage on the calcium bowl

475 Lin Bao, Christina Kaldany, Ericka C. Holmstrand, and Daniel H. Cox. Mapping the BK_{Ca} channel's "Ca^{2+} bowl": side-chains essential for Ca^{2+} sensing

491 Hisayoshi Hayashi, Katalin Szászi, Natasha Coady-Osberg, Wendy Furuya, Anthony P. Bretscher, John Orlowski, and Sergio Grinstein. Inhibition and redistribution of NHE3, the apical Na^+/H^+ exchanger, by *Clostridium difficile* toxin B

505 Harley T. Kurata, Zhuren Wang, and David Fedida. NH_2-terminal inactivation peptide binding to C-type–inactivated Kv channels

521 Sarah L. McCabe, Diana M. Pelosi, Michelle Tetreault, Andrew Miri, Wang Nguitragool, Pranisa Kovithvathanaphong, Rahul Mahajan, and Anita L. Zimmerman. All-trans-retinal is a closed-state inhibitor of rod cyclic nucleotide–gated ion channels

533 Rafael A. Rosales, Michael Fill, and Ariel L. Escobar. Calcium regulation of single ryanodine receptor channel gating analyzed using HMM/MCMC statistical methods

555 Dmytro Isaev, Karisa Solt, Oksana Gurtovaya, John P. Reeves, and Roman Shirokov. Modulation of the voltage sensor of L-type Ca^{2+} channels by intracellular Ca^{2+}

573 Karin L. Németh-Cahalan, Katalin Kalman, and James E. Hall. Molecular basis of pH and Ca^{2+} regulation of aquaporin water permeability

581 Alexander V. Zholos, Andrey A. Zholos, and Thomas B. Bolton. G-protein–gated TRP-like cationic channel activated by muscarinic receptors: effect of potential on single-channel gating

599 Jens A. Lundbæk, Pia Birn, Anker J. Hansen, Rikke Søgaard, Claus Nielsen, Jeffrey Girshman, Michael J. Bruno, Sonya E. Tape, Jan Egebjerg, Denise V. Greathouse, Gwendolyn L. Mattice, Roger E. Koeppe II, and Olaf S. Andersen. Regulation of sodium channel function by bilayer elasticity: the importance of hydrophobic coupling. Effects of micelle-forming amphiphiles and cholesterol

623 Scott A. John, Lai-Hua Xie, and James N. Weiss. *Letter to the Editor:* Mechanism of inward rectification in Kir channels

627 Correction

VOLUME 123 • NUMBER 6 • JUNE 2004

629 Olaf S. Andersen. 50-year anniversary of sliding filament

631 Andrew G. Szent-Györgyi. *Milestone in Physiology:* The early history of the biochemistry of muscle contraction

643 Roger Cooke. *Milestone in Physiology:* The sliding filament model: 1972–2004

657 Mark S. Shapiro. *Commentary:* Why biophysicists make models: quantifying modulation of the M current

663 Byung-Chang Suh, Lisa F. Horowitz, Wiebke Hirdes, Ken Mackie, and Bertil Hille. Regulation of KCNQ2/KCNQ3 current by G protein cycling: the kinetics of receptor-mediated signaling by G_q

685 Jon T. Sack, Richard W. Aldrich, and William F. Gilly. A gastropod toxin selectively slows early transitions in the Shaker K channel's activation pathway

697 Paul J. Groot-Kormelink, Steven D. Broadbent, James P. Boorman, and Lucia G. Sivilotti. Incomplete incorporation of tandem subunits in recombinant neuronal nicotinic receptors

709 Mouhamed S. Awayda, Weijian Shao, Fengli Guo, Mark Zeidel, and Warren G. Hill. ENaC–membrane interactions: regulation of channel activity by membrane order

729 Clint L. Makino, R.L. Dodd, J. Chen, M.E. Burns, A. Roca, M.I. Simon, and D.A. Baylor. Recoverin regulates light-dependent phosphodiesterase activity in retinal rods
